the nineteenth century witnessed a dramatic shift in the display and dissemination of natural knowledge across Britain and America from private collections of miscellaneous artifacts and objects to public exhibitions and state sponsored museums the science museum as we know it an institution of expert knowledge built to inform a lay public was still very much in formation during this dynamic period science museums in transition provides a nuanced comparative study of the diverse places and spaces in which science was displayed at a time when science and spectacle were still deeply intertwined when leading naturalists curators and popular showmen were debating both how to display their knowledge and how and whether they should profit from scientific work and when ideals of

nationalism class politics and democracy were permeating the museum's walls contributors examine a constellation of people spaces display practices experiences and politics that worked not only to define the museum but to shape public science and scientific knowledge taken together the chapters in this volume span the atlantic exploring private and public museums short and long term exhibitions and museums built for entertainment education and research and in turn raise a host of important questions about expertise and about who speaks for nature and for history

the essays in this volume are organised thematically the first essay sets the scene by reviewing the present position and future potential of science museums as educational and cultural resources the next section is devoted to the role of museum exhibitions and analyses how exhibitions deal with complex material the third section is concerned with museum programmes and reports on the strengths and weaknesses of different museum programmes ranging from gallery drama to the boston museum's innovative experiment with science by mail

the science museum explores how these institutions shape our understanding of science and technology through exhibit design and educational programming moving beyond the idea of museums as mere artifact repositories the book presents them as active players in fostering scientific literacy particularly through interactive exhibits these exhibits designed with user experience in mind leverage multimedia and technology to offer personalized learning opportunities the book progresses from the historical context of science museums to an examination of interactive exhibits and their design principles it also assesses the effectiveness of museum education by exploring evaluation methodologies and challenges in reaching diverse audiences by drawing on research in museum studies education and psychology alongside insights from museum professionals the book provides a thorough overview of the science museum landscape this book is particularly valuable because it examines the debates around balancing entertainment and education as well as ethical considerations tied to technology in museums by using case studies and a clear accessible writing style the science museum is a comprehensive resource for understanding the evolving role of science museums and their potential to inspire future generations

what goes on behind closed doors at museums how are decisions about exhibitions made and who or what really makes them why are certain objects and styles of display chosen whilst others are rejected and what factors influence how museum exhibitions are produced and experienced this book answers these searching questions by giving a privileged look behind the scenes at the science museum in london by tracking the history of a particular exhibition macdonald takes the reader into the world of the museum curator and shows in vivid detail how exhibitions are created and how public culture is produced she reveals why exhibitions do not always reflect their makers original intentions and why visitors take home particular interpretations beyond this local context however the book also provides broad and far reaching insights into how national and global political shifts influence the creation of public knowledge through exhibitions

a fun vibrantly illustrated behind the scenes tour of the inner workings of a natural history museum and all the incredible people who work there welcome to the science and natural history museum here you ll see all kinds of cool things from a whole dunkleosteus skeleton to a tiny dwarf seahorse to a glimpse of the andromeda galaxy you ll also meet all kinds of cool people like volcanologists paleontologists squid biologists and many more who research fascinating questions so that they can answer yours but what do these people do all day at the science museum well there s only one way to find out join a field trip through the busy museum and find out about all the kinds of scientists who work there and each of their incredible fields science is cool this book introduces science technology engineering and mathematics through content that makes big ideas entertaining and exciting it s perfect for sparking curiosity inspiring future scientists and showing kids of all interests why science matters and can be so much fun giftable nonfiction beautifully illustrated encyclopedic nonfiction is a terrific choice for young learners this is the kind of book that makes a perfect gift for curious kids one they will want to pore over for hours and read again and again institutional appeal featuring a wide range of exhibitions and scientists this is a great fit for many science museums it also provides educators and steam professionals with an engaging way to introduce the many career opportunities available in science all star team maggie tokuda hall is an award winning bestselling author and a founding member and national leader of authors against book bans qin leng has illustrated many beloved titles that have received great acclaim together they ve created a unique gorgeously rendered picture book that readers of all ages will enjoy perfect for young readers fascinated by natural history science and museums anyone who dreams of being one of the scientists of tomorrow kids who like animals dinosaurs and learning how the world around them works teachers librarians and parents seeking fun and accessible nonfiction museums looking to give patrons a sneak peek at the inner workings of their operations

an engaging study of a great national institution essays explore the changing roles of museums and the perceived public role of a museum of science and technology illuminates the ways in which we think about the collecting and display of objects and the often difficult relations between the state business and industry and museum funding

controversy in science museums focuses on exhibitions that approach sensitive or controversial topics with a keen sense of past and current practices pedretti and navas iannini examine and re imagine how museums and science centres can create exhibitions that embrace criticality and visitor agency drawing on international case studies and voices from visitors and museum professionals as well as theoretical insights about scientific literacy and science communication the authors explore the textured notion of controversy and the challenges and opportunities practitioners may encounter as they plan for and develop controversial science exhibitions they assert that science museums can no longer serve as mere repositories for objects or sites for transmitting facts but that they should also become spaces for conversations that are inclusive critical and socially responsible controversy in science museums provides an invaluable resource for museum professionals who are interested in creating and hosting controversial exhibitions and for scholars and students working in the fields of museum studies science

communication and social studies of science anyone wishing to engage in an examination and critique of the changing roles of science museums will find this book relevant timely and thought provoking
